# FROGS

## Science Experiment!

Results

The car traveled the furthest on the cardboard surface it traveled 180cm.

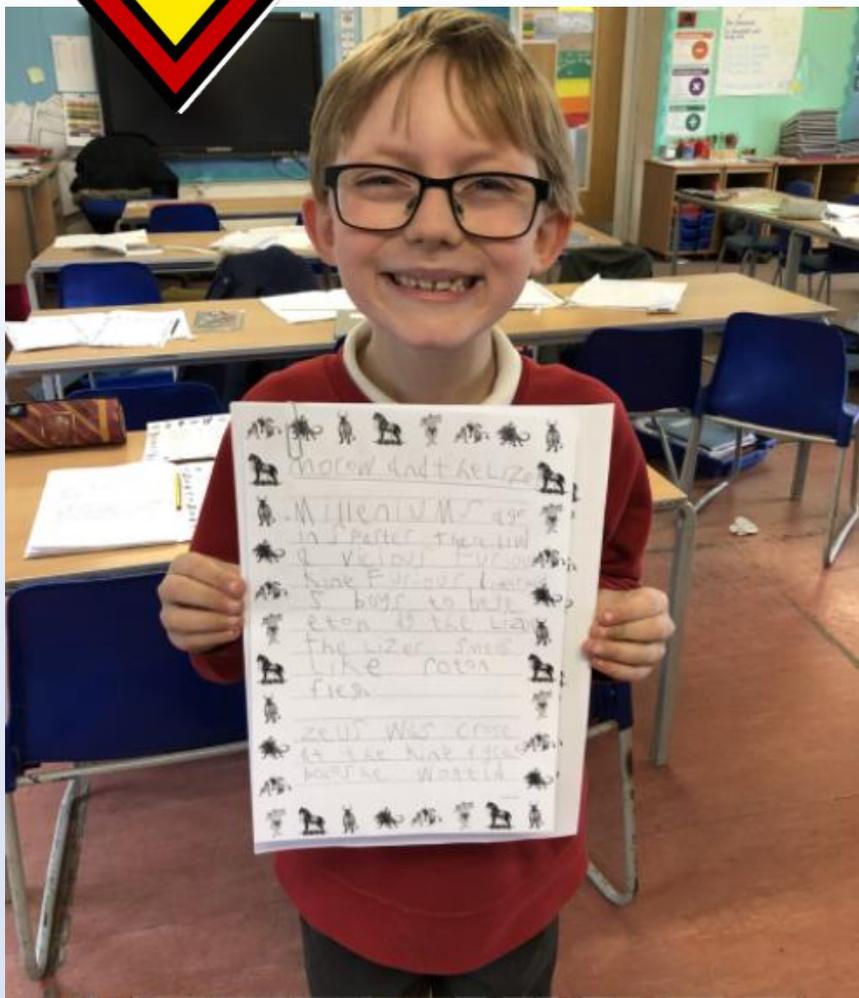

The car traveled the least furthest on the carpet surface it traveled 100cm.

Conclusion

The reason why the car traveled furthest on the cardboard because the cardboard has less friction so it is able to move more easily and the carpet has more friction so the car couldn't go as fast.

# SUPER SID!

**Sid is an absolute hero. He used to find writing tricky, but today he wrote a Greek myth that is five pages long! He used capital letters, finger spaces and punctuation correctly. Well done Sid!**
